

The only managed service that takes complete responsibility for your cybersecurity, and delivers **superior protection** with **complete cost control**

Unlike many so-called managed services, F12 Secure takes full responsibility for your IT security.

Never worry about network breaches, malicious apps, or the errant clicks of your staff:

F12 Secure means your security tech stack is always leading-edge.

Bolster IT protections with best-of-breed security training and compliance and reporting policies.

And enjoy the backing of a security operations center equipped for 24/7 monitoring, immediate incident response and remediation.

All for a flat monthly fee.

Get on with business instead trying to manage cybersecurity. Get F12 Secure.

Comprehensive cybersecurity

SOC 2 Type II and CyberSecure certified provider

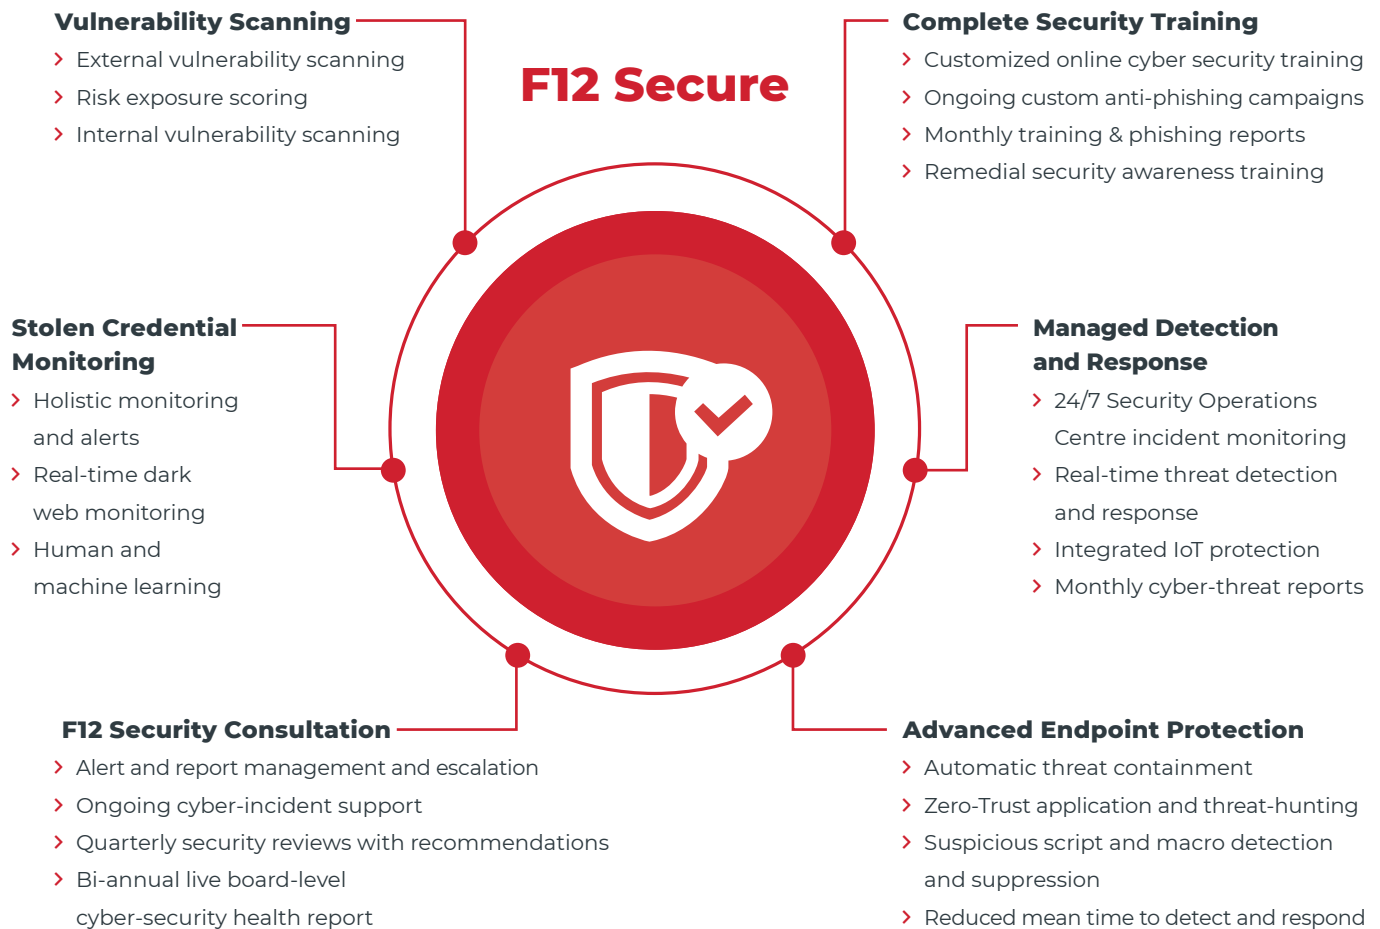

All for a flat monthly fee

Strong, pro-active cybersecurity

When reputation is everything, cybersecurity is non-negotiable. That's why we've developed our platform from the ground up based on the NIST Cyber Security Framework and CIS Controls.

F12 is one of a handful of SOC Type II CyberSecure Canada-certified IT providers. We use auditable data governance policies so you can prove that your procedures are compliant and that client data is controlled and protected to the necessary standards.

The strongest end-to-end cybersecurity

Additional options

- > Penetration testing
- > Red Team exercises

Fulfillment

All security assessments, deployment, and quarterly reporting is performed by an accredited F12 Security Expert from our Security and Compliance team.

About F12

F12 has been creating streamlined technology solutions for more than 20 years. F12 aims to eliminate the IT treadmill of forced obsolesce and never-ending project billing with an adaptable IT platform at a predictable per-user price.
